

Exploring perceived barriers and facilitators to the delivery of primary mental health care to under-resourced communities in South Africa by Registered Counsellors in private practice.

Research study

You are invited to participate in a research study that aims to explore your experience of delivering primary mental health care to under-resourced communities in South Africa.

If you wish to participate, you need to

- * be a registered counsellor in private practice
- * be registered with the HPCSA
- * have at least one year's experience of working in private practice
- * be able to converse in English or Afrikaans.

As a participant, you will be requested to take part in an individual interview at a time that is convenient for you. Interviews will be conducted only via Skype or telephonically, and I will conduct all interviews.

If you are interested in participating and / or you have any questions about this study, please contact me on the details provided below.

This study is affiliated with Stellenbosch University, South Africa.
